

JOEL SOLAECHE

AI Engineer | Full-Stack Developer | LLM & Agentic Systems

Buenos Aires, Argentina • +54 11 5107 3821 • joel_solaecche@hotmail.com

[Portfolio](#) • [LinkedIn](#) • [GitHub](#)

PROFESSIONAL SUMMARY

AI Engineer with 3+ years building production-grade ML, LLM, and agentic systems end-to-end. Specialized in RAG pipelines, multi-agent orchestration (LangChain, LangGraph, MCP), computer vision (YOLO, OpenVINO, TensorRT), and full-stack AI applications on Next.js, FastAPI, and Docker. Track record of measurable impact — \$500K+ in default prevention, 95%+ model accuracy, and 90% time reduction in real-world deployments. Multilingual (Spanish native, English C1, Japanese N2) with proven success in distributed, remote-first international teams.

CORE SKILLS & TECHNOLOGIES

AI / LLM / Agents: LangChain, LangGraph, MCP, OpenAI GPT-4o, Anthropic Claude, Hugging Face, RAG, Vector DBs (Pinecone, ChromaDB, Neo4j), Prompt Engineering, RLHF, Vercel AI SDK, Multi-Agent Orchestration

Machine Learning & CV: TensorFlow, PyTorch, Scikit-learn, Keras, OpenCV, YOLO11, OpenVINO, TensorRT, NVIDIA SDK, Jetson Nano, ResNet, Pandas, NumPy, Matplotlib

Backend & Cloud: Python, FastAPI, Flask, Node.js, Spring Boot, Docker, AWS, Vercel, Apache Airflow, Supabase, Firebase, Chainlit, Streamlit

Frontend: Next.js 15, React, TypeScript, JavaScript, Tailwind CSS, shadcn/ui, HTML5, CSS3

Data & DevOps: PostgreSQL, MySQL, MongoDB, Redis, SQL, Git, GitHub Actions, Cursor, Devcontainers, Postman, Scrum/Kanban

Languages: Spanish (Native) • English (C1 Advanced) • Japanese (N2 Advanced)

PROFESSIONAL EXPERIENCE

AI Engineer — Taller Technologies

Mar 2026 – Present

Remote (United States) • Full-time

- Contributing to **Chiron**, an agentic OS platform that orchestrates multiple AI engineering agents for code analysis, document processing, and automated project setup.
- Building an AI-native e-learning platform on Next.js 15 + Supabase (Auth, Postgres, RLS) with Mux video streaming, interactive quizzes, and an Anthropic-powered AI tutor.
- Resolved data persistence bugs by bind-mounting Firebase emulator data across container restarts in Docker Compose; eliminated duplicate-agent state conflicts.
- Drove Clean Architecture refactors (domain / application / infrastructure) and authored DevOps onboarding scripts (setup.sh, rebuild.sh) for streamlined developer experience.

Stack: TypeScript, Next.js, Node.js, Supabase, Mux, Vercel AI SDK, Anthropic API, Docker, Firebase, Pinecone, Neo4j, InversifyJS

AI Trainer — Coding Tools — LinkedIn

Apr 2026 – Present

Remote (United States) • Part-time Contract

- Author ground-truth code in real open-source repositories to evaluate AI code-completion tools across TypeScript, JavaScript, and other languages.
- Benchmark leading AI coding assistants on suggestion quality, latency, and contextual understanding using a defined scoring rubric across refactors, bug detection, and pattern completions.

AI Engineer — Algolabs AI

Oct 2025 – Mar 2026

Remote (Argentina)

- Deployed a production YOLO-based computer-vision system for warehouse robotics achieving **95%+ accuracy** and an **85% reduction in manual verification** across pallet recognition workflows.
- Built end-to-end full-stack CV application (Flask + MongoDB); deployed CNN detection, classification, and segmentation pipelines to edge devices (Jetson Nano).
- Owned dataset preparation (cleaning, labeling, augmentation) and tuned models against accuracy/efficiency metrics in Scrum/Kanban workflows.

Stack: TensorFlow, PyTorch, OpenCV, OpenVINO, NVIDIA SDK, TensorRT, DeepStream, Jetson Nano, Flask, MongoDB, Docker, Git

AI Trainer & Developer — Scale AI

Aug 2024 – Sep 2025

Remote (United States)

- Contributed to the evaluation and refinement of leading AI code assistants — **Claude Code, GitHub Copilot, Codex, Gemini Code Assist** — through multi-turn prompt engineering and rubric-based evaluation.
- Designed context-engineered prompts and evaluation frameworks for AI agents performing refactoring, debugging, and documentation tasks.
- Dockerized repositories for automated, reproducible testing integrated with GitHub for continuous evaluation; prototyped command-driven AI workflows using Cursor and MCP.
- Collaborated in an RLHF pipeline improving AI reasoning across structured text and code contexts.

Machine Learning Engineer — Anyone AI

Nov 2024 – Mar 2025

Remote · Elite ML Program (<2% acceptance rate)

- **AI-Powered Shopping Assistant** — Production-ready conversational AI on LangGraph + MCP for a ~50K-product catalog — semantic search, cart management, purchase-history recommendations, and human-in-the-loop escalation with 100% test coverage.
- **LLM Recruitment Tool** — RAG system on LangChain + GPT-4 / Gemini + ChromaDB for semantic candidate-job matching, agentic cover-letter generation, and conversation memory — reduced screening time by 90%.
- **Home Credit Risk Model** — Trained XGBoost / LightGBM / DecisionTree models on a 350K+ transaction dataset, achieving AUC ROC > 0.72 for high-risk applicant identification.
- **Multimodal Product Classifier** — NLP + Computer Vision pipeline with embedding generation and pre-trained feature extractors — 85%+ accuracy across 49K+ e-commerce products.
- **E-Commerce ELT Pipeline** — Apache Airflow orchestration analyzing \$2.8M+ in revenue and automating 20+ hours/month of seasonal-trend reporting.

Software Development Intern — Helte Co., Ltd.

Aug 2024 – Nov 2024

Tokyo, Japan (Remote)

- Earned a fully-funded internship via the **Helte Award** at the world's largest online Japanese speech contest (Sail Dream Project, 3rd Edition).
- Drove a UI/UX redesign of the home page that increased user traffic by **40%** through data-driven design decisions.

EDUCATION

B.S. Computer Software Engineering — UADE — Argentine University of the Enterprise

Expected Aug 2026

Machine Learning Engineer Specialization — Anyone AI · <2% acceptance rate

Mar 2025

CERTIFICATIONS & AWARDS

- **AI Agents Specialization** — LangChain, LangGraph, CrewAI, MCP, Tool Use, Human-in-the-Loop, Multi-Agent Orchestration (2026)
- **LLM-Based Applications Development** — RAG architecture, prompt engineering, vector databases, agentic AI systems (2025)
- **Machine Learning Engineer Certificate** — Anyone AI (2025)
- **Helte Award — Sail Dream Project** — Global winner, world's largest online Japanese speech contest (2024)
- **EFSET English C1 Advanced** (2023) · **JLPT N2 Japanese** (2022) · **Cambridge FCE B2** (2022)
